

# SILVERPLUS

SilverPlus is an oral supplement consisting of 3mcg/ml of silver ions in deionised water.

Silver is a catalyst causing oxidation of microbes therefore starving, suffocating and stopping the microbes cell division.

SilverPlus as an adjunct therapy potentiates the activity of different classes of antibiotics

*Boosting  
Your  
Health  
Adjunct Therapy*

# SILVERPLUS

## **Immune Boosting Activity**

Silver ions enhance the ability of immune cell to lyse infectious agents through ROS like super oxide and hydrogen peroxide. They activate mast cells which are a key component of the immune system and play an important role in allergic reactions, wound healing and defense against pathogens, these activated mast cells then destroy microbial cells before they can colonise the key areas of the body.

The ions stimulate the lymphatic system which filters out toxins from the circulatory system in the body.

They modulate cytokine expression, resulting in both reduced inflammation and increased healing.

## **SILVERPLUS Benefits**

1. SilverPlus is used to boost your immune system.
2. As an adjunct therapy for the treatment of bacterial, fungal parasitic and viral infections.

## **What are the features and benefits of SilverPlus**

<i>Benefits</i>	<i>Features</i>
1. Biocidal properties on nano silver	Effectively bacterialcidal and fungicidal
2. Catalytic oxidation	Effectively bacterialcidal and fungicidal
3. Binding with bacteria, fungi and virus DNA	Prevents cellular replication of the bacteria, fungi, virus thus controlling the infection
